

in cooperation with

CANS 2012

11th International Conference on Cryptography and Network Security

December 12–14, 2012 in Darmstadt (Germany)

<http://cans2012.cased.de>

Call for Participation

The International Conference on Cryptology and Network Security (CANS) is a recognized conference focusing on all aspects of cryptology and network security, attracting cutting-edge results from world-renowned scientists in the area. It is regularly in cooperation with the International Association for Cryptologic Research (IACR). The 11th edition of the conference will be held for the first time in Europe, organized by Center for Advanced Security Research Darmstadt (CASED).

CANS 2012 will be held at the modern congress center Darmstadtium, located in the city center. Darmstadt is conveniently reachable from Frankfurt International Airport via a direct bus connection.

The CANS 2012 program comprises 2 invited talks and 22 contributed papers. The invited talks will be given by Prof. Bart Preneel (KU Leuven) and Prof. Dennis Hofheinz (Karlsruhe Institute of Technology). All researchers and students are welcome to participate. In an informal atmosphere participants will be able to interact and collaborate during the conference. Please visit the CANS 2012 website (<http://cans2012.cased.de>) for more information about accepted papers, conference program, social program, and accommodation and travel directions.

Registration is open at: <http://cans2012.cased.de/reg.html>

Register **until 16.11.2012** at the ‘early registration’ rate of EUR 500 (regular) or EUR 390 (students).

Please join us in Darmstadt for the

11th International Conference on Cryptology and Network Security!

Your CANS 2012 chairs

Josef Pieprzyk (Macquarie University)

Ahmad-Reza Sadeghi (TU Darmstadt)

Mark Manulis (University of Surrey)
